

Project background

TikTok's data team is working on the claims classification project. The following tasks are needed at this stage of the project:

- Explore the project data
- Implement a hypothesis test
- Communicate insights with stakeholders within TikTok

The assignment

Conduct hypothesis testing on the data for the claims classification data. Investigate TikTok's user claim dataset to determine which hypothesis testing method best serves the data and the claims classification project.

Specific project deliverables

- Consider the different groups of data represented in the dataset
- Implement a hypothesis test
- Create an executive summary to share your results
