

Project background

TikTok's data team is in the earliest stages of the claims classification project. The following tasks are needed before the team can begin the data analysis process:

- Build a dataframe for the TikTok dataset
- Examine data type of each column
- Gather descriptive statistics

The assignment

Build a dataframe for the claims classification data. After the dataframe is complete, organize the claims data for the process of exploratory data analysis, and update the team progress and insights.

Specific project deliverables

With this end-of-course project, you will gain valuable practice and apply your new skills as you complete the following:

- Complete coding prep work on project's Jupyter notebook
- Summarize the column Dtypes
- Communicate important findings in the form of an executive summary
