## Project background

TikTok's data team is near the end of the claims classification project. The following tasks are needed to complete the project:

- Model building
- Model evaluation
- Summarize findings for cross-departmental stakeholders within TikTok

## The assignment

Create the final machine learning model for the claims classification data. These final tasks include feature engineering, model development, and evaluation.

## Specific project deliverables

- Build a machine learning model
- Evaluate the model
- Interpret the results
- Create an executive summary to share your results with cross-departmental stakeholders within TikTok
